FIRE SAFETY MANAGEMENT

STATEMENT OF INTENT

Adult Education in Gloucestershire believes that ensuring the health and safety of staff, visitors, service users and all relevant persons is essential to our success.

We are committed to:

1. Preventing accidents and work related ill health.

2. Compliance with statutory requirements as a minimum.

3. Assessing and controlling the risks that arise from our work activities.

4. Providing a safe and healthy working and learning environment.

5. Ensuring safe working methods and providing safe working equipment.

6. Providing effective information, instruction and training.

7. Consulting with employees and their representatives on health and safety matters.

8. Monitoring and reviewing our systems and prevention measures to ensure their effectiveness.

9. Setting targets and objectives to develop a culture of continuous improvement.

10. Ensuring adequate welfare facilities exist throughout the department.

11. Ensuring adequate resources are made available for health and safety issues, so far as is reasonably practicable.

A Fire Safety Management System will be created to ensure the above commitments can be met. Employees throughout the department must play their part in the creation of a safe and healthy working environment for all.

Signed: ___________________________________   Date:  __________________

Head of Service
1 INTRODUCTION AND SCOPE

1.1 Fire is a hazard in any part of the premises. Its consequences include the threat to the lives or health and safety of relevant persons, damage to or loss of property and severe interruption to normal business activities or opportunities.

1.2 Managing the risk of fire demands fire safety precautions based on a combination of appropriate prevention and protection measures depending upon building use and occupancy, the inherent fire risks and the legal obligations laid on Adult Education in Gloucestershire as the occupier.

1.3 This fire safety management and fire emergency plan applies to all premises which are to any extent under the control of the Adult Education in Gloucestershire as the occupier. Its requirements extend to all persons at those premises including staff, visitors and contractors whether permanently or temporarily engaged.

1.4 Where premises are jointly occupied or control of premises is shared with other employers then the arrangements for fire safety and maintenance will be coordinated, communicated and documented. In these premises the fire safety arrangements and procedures of the principal or host occupier shall apply or local variations agreed by all relevant parties and relevant persons.

1.5 This fire safety management and fire emergency plan applies to all other staff working in the premises of the Adult Education in Gloucestershire.

1.6 Adult Education in Gloucestershire will, so far as is reasonably practicable, and in accordance with legal obligations and standards, in respect of every premises to:

- provide and maintain passive and active fire prevention, protection and measures according to the purpose or use of the building, the numbers of occupants and the activities or processes undertaken therein;

- provide comprehensible and relevant information to staff and others, through the provision and availability of emergency instructions or fire safety plans and the risks identified by relevant risk assessments;

- provide a programme of fire safety training;

- carry out and keep under review a fire risk assessment to analyse building and process fire risks, the existing preventive and protective measures and to identify areas for improvement;

- have in place a programme of works to improve or maintain the existing fire safety specifications;

- identify a sufficient number of persons, whether staff, security or others, to be present at all times the building is occupied with responsibility for initiating the fire evacuation procedure and provide information and assistance to the fire service;

- where appropriate, to prepare and keep under review risk assessments in relation to the use, storage, handling, disposal and transportation of dangerous substances and ensure that, so far as is reasonable practicable, the risks associated with dangerous substances are reduced or controlled.
2 PRACTICAL FIRE SAFETY ARRANGEMENTS

2.1 As part of a holistic fire safety management system, in addition to the management action outlined below, considerations of passive and active fire precautions are essential.

2.2 Passive fire precautions are concerned with the physical conditions in premises which are designed to facilitate containment of fire by design, construction and layout, effective communication and safe evacuation. In particular the:

- materials specification, design, construction and inspection of buildings, fire doors and escape routes taking into account the needs of learners, service users, people with disabilities, contractors, the public, etc;

- appropriate safe and secure location of building services e.g. gas and electricity;

- provision of clear fire safety signage for escape routes and final exits in conformity with the Health and Safety (Safety Signs and Signals) Regulations 1996 and Disability Discrimination Act 1995;

- provision of prominently located fire action notices (e.g. by fire alarm manual break glass points) to inform people of the action to be taken in the event of fire; and

- education and training of staff in fire safety arrangements, in particular evacuation procedures and drills.

2.3 Active fire precautions are those features of the fire safety management system that detect and operate in the event of a fire, including fire alarm systems, emergency lighting systems and fire fighting equipment. In particular:

- the installation, maintenance, inspection and weekly testing of fire alarms;

- the appropriate design, location, operation, monthly inspection and annual testing of adequate (emergency) lighting systems for fire escape routes;

- the provision, use, appropriate type and location, and annual maintenance of portable fire extinguishers.

- A quarterly / six monthly / annual premises fire safety inspection will be carried out.

2.4 The fire safety arrangements will be based on HSG 65 Successful Health and Safety Management and the Fire Safety Management Plan Strategy (see Appendix 1). The main strands of the strategy involves:

- Effective planning, organisation, control, monitoring and review of protective and preventative measures
- Fire safety risk assessments and building audits
- Fire safety systems and maintenance
- Fire warden and staff training
- Fire evacuation drills
- Building design, alterations and commissioning
3 PLANNING

3.1 Fire risk assessments are a requirement of the Regulatory Reform (Fire Safety) Order and are a structured approach to determining the risk of fire occurring in a premises or from a work activity, and identifying the precautions necessary to eliminate, reduce or manage the risk. The outcome of the risk assessment must be incorporated in the fire emergency plan (see Section 7).

3.2 Fire Risk Assessments must be carried out and reviewed regularly (recommended to be annually) or when there is any building alteration or change of occupation and use of the premises, or following a fire incident/emergency, etc.

3.3 The risk evaluation and appropriate control measures to be taken into account will include those practical fire safety arrangements outlined above. The methodology adopted will be:

<table>
<thead>
<tr>
<th>Risk Level</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>High Risk</td>
<td>Work to be completed within 4 to 8 weeks</td>
</tr>
<tr>
<td>Medium Risk</td>
<td>Work to be completed within 6 months</td>
</tr>
<tr>
<td>Low Risk</td>
<td>Work to be completed within 1 year</td>
</tr>
</tbody>
</table>

3.4 Risk assessments must take into account those who could be affected, e.g. numbers involved, their location, physical and mental capabilities and employees of organizations with whom a workplace is shared. The significant findings of the fire safety risk assessment will be made known to all other responsible persons as appropriate.

3.5 Where appropriate, an individual Personal Emergency Evacuation Plan (PEEP) must be developed for staff, learners or service users who have known disabilities that will impact on their ability to evacuate the particular premises.

3.6 Maintenance of fire safety systems falls under the umbrella of the Fire Maintenance Contract. The provisions of the contract ensure maintenance of fire systems and equipment is carried out in compliance with the Regulatory Reform (Fire Safety) Order 2005 and Approved Codes of Practise and other associated legislation. The contract will ensure that Fire Maintenance Contractors are fully inducted for safe work practices and are fully qualified to carry out maintenance on fire safety systems and will include:

- Fire detection and warning system
- Emergency lighting
- Fire fighting facilities
- Emergency routes and exits
- Fire safety signs and notices
- Portable electrical appliances (PAT) and premises installation testing (5 yearly)

3.7 The fire safety maintenance programme will follow the guidelines suggested in HM Government Fire Safety Risk Assessment guidance and can be found in Appendix 2.

3.8 Fire Warden and staff training courses are provided through Adult Education in Gloucestershire who conduct a number of refresher courses annually. The course is delivered by a qualified competent person from Adult Education in Gloucestershire (Office and Service Delivery Manager). It is the responsibility of all trained Fire Wardens to attend one refresher training annually on one of the dates available. A sample fire safety training programme and staff training record can be found in Appendix 3 and 4 respectively.
3.9 Fire evacuation exercises will be carried out annually within the premises. The purpose of these exercises is to educate premises occupants in the correct manner of evacuating a building in the event of an emergency situation and to meet legal obligations. All evacuations will be conducted by the Fire Wardens under the guidance of a Fire Safety Officer. Pre and post de-briefing sessions will accompany each evacuation drill.

3.10 Provisions will be made for the safe evacuation of disabled people.

3.11 Fire evacuation of the building will be in accordance with established procedures in the fire emergency plan (Section 7). In the event of a fire alarm outside of normal business hours, building occupants are to evacuate the building. All staff, visitors and contractors will be made aware of the fire procedures.

3.12 All building design work shall comply with relevant codes and standards.

3.13 Testing of building passive and active fire evacuation systems are to be conducted by the Office and Service Delivery Manager at agreed appropriate times during normal hours and in line with current British or European test standards. All building fire wardens will be trained in the use of the evacuation system and operate from pro-forma instructions based on Section 7.

3.14 Fire wardens will report any faults or problems to their Managers who will forward the details to the Head of Service.

3.15 A fire safety log book will be kept to record the details of all tests on passive and active preventative and protective measures, as well as training and fire drills.

3.16 To help make this policy manageable throughout the year an annual management cycle reflecting these elements is shown below. The cycle timetable is recommended below and information on each stage follows.
4 ORGANISATION AND CONTROL

4.1 Specific named individual responsibility for overall responsibility for Fire Safety, maintenance, Emergency Plans and Staff Training can be found in Appendix 5.

4.2 Head of Service of Adult Education in Gloucestershire will:

- ensure that this plan is properly implemented and reviewed;
- ensure that a Responsible Person is appointed for the premises to oversee and implement fire safety arrangements, and ensure that they are competent and appropriately trained to undertake their duties;
- ensure that arrangements are in place for the completion of fire risk assessments, including, where appropriate, technical surveys in respect of fire protection;
- ensure that fire, security, and health and safety arrangements at each premises are complementary.

4.3 Managers with responsibility for premises or parts of premises will:

- ensure that fire risk assessments are carried out for all their workplaces, and for specific activities such as hot working involving welding, cutting, work with bitumen, etc;
- ensure, in conjunction with the outcome of the fire risk assessment that the optimum number and type of fire extinguishers are installed in appropriate locations;
- ensure that fire alarm and detection systems, emergency lighting and fire extinguishers are appropriately located and properly maintained;
- ensure that a robust and effective emergency plan is in place at each location to safely evacuate all persons, whether employees, visitors or service users. This emergency plan must take into account people with mobility, some sensory and some learning impairments, including those with temporary impairments, which will affect their ability to use stairs or otherwise evacuate premises promptly. the plan must be internally deliverable and not reliant on the Fire and Rescue Service to complete the evacuation;
- arrange for the emergency plan to be issued to their employees, visitors, etc. to inform them what to do in the event of fire, particularly safe evacuation;
- arrange for a competent responsible person (who may also be the premises coordinator) to be nominated to oversee and implement fire safety arrangements at their workplace(s) on their behalf;
- ensure that staff are appropriately trained in fire safety procedures to reflect the requirements of the fire risk assessment;
- ensure that a copy of the current fire risk assessment for their premises is readily accessible, its provisions complied with;
- ensure that fire risk assessments are reviewed at least annually or whenever there is any building alteration, change of occupation or use of the premises or following an incident involving fire;
- ensure that effective arrangements are in place for contacting the emergency services;
- ensure that the Fire and Rescue Service are aware of any significant hazards associated with the premises e.g. oxygen cylinders, storage of petrol, etc;
- confirm that at their premises fire safety inspections address fire safety arrangements;
- liaise with the local trade union safety representative, where appointed, on all aspects of the above arrangements.

4.4 The Competent Persons (who must be competent to carry out this role) must:
- assist and support with the preparation and review (at least annually) of fire safety risk assessments;
- ensure compliance with the outcomes of the Fire Risk Assessment and that the necessary control measures are implemented;
- prepare and review the emergency plan issued to all staff;
- ensure information on fire safety arrangements is available to service users and visitors;
- ensure all staff and, where appropriate, contractors are instructed in the emergency plan;
- arrange and review fire drills at a frequency of not less than six months;
- specify and rehearse the arrangements for assisting visitors, disabled people or those with temporary physical impairments to safely evacuate the premises. Where appropriate, a PEEP must be developed;
- ensure Fire Alarms are regularly tested at the recommended frequency e.g. weekly;
- monitor that fire alarm systems, detection devices, emergency lighting and fire extinguishers are appropriately and regularly maintained;
- keep the fire log book or equivalent up to date;
- ensure that fire action notices (displayed as a minimum at fire alarm call points) and fire signage are appropriate and kept up to date;
- ensure all escape routes are kept clear of obstructions and that access to fire extinguishers and fire alarms is not impeded;
- ensure that the annual testing of portable electrical equipment and periodic testing (5 yearly) of the fixed electrical installations has been carried out, and
- ensure that quarterly fire safety inspections of the premises are carried out and that these address fire safety arrangements.
4.5 Employees must:

- ensure they are familiar with the emergency plan for their workplace and co-operate by participating in fire evacuation/drill procedures and by observing practical fire safety arrangements;

- know, and co-operate with, the responsible person for their workplace;

- report to their manager or supervisor any concerns about fire safety;

- be familiar with all escape routes;

- not wedge fire doors open, nor block or obstruct them;

- be aware of the action to be taken on discovering a fire, hearing a fire alarm, for raising the alarm (including the location of fire alarm call points) and calling the fire and rescue service;

- promptly evacuate the premises, in accordance with the emergency plan, to a place of safety without putting themselves and others at risk, and NOT attempt to extinguish a fire unless they have been specifically trained; and

- comply with the No Smoking legislation.

5 MONITORING

5.1 The following Key Performance Indicators will be used to monitor the effectiveness of the Fire Safety Management Plan:

i. Number of fires recorded annually / number of fire related incidents.

ii. achieving set schedules and time frames (evacuation drills and building audits).

iii. Measuring the number of Fire Service call outs against cause.

iv. Number and nature of enforcement, alterations or prohibition notices from statutory authorities.

v. Quarterly / six monthly/ annual premises inspection and meetings to ensure actions and progress are made.

vi. Annual audit of all fire systems by the chief executive / managing director.

6 REVIEW

6.1 Annual audit of all fire systems by the Head of Service to ascertain compliance with this Fire Safety Management Plan.

6.2 Active reviews will take place quarterly prior to any likely accident or event.

6.3 Reactive reviews will take place following a fire safety event occurring.

6.4 A review will also be undertaken following a fire, changes to the premises construction and facilities, new procedures, new equipment, new materials and changes in staff numbers and roles.
7 FIRE EMERGENCY PLAN.

All aspects of this plan will consider the following :-

7.1 Training and Training Provision.

Identify any training needed and how it will be provided.

7.2 Information Distribution.

Detail the method(s) of informing personnel (incl. visitors / contractors) of escape routes. This should include the following :-

- Instruction.
- Training.
- Emergency exit / route signage.
- Fire action notices.
- Include method of informing personnel of an alternative escape route should the main one be blocked or inaccessible. (Consideration should also be given to a route that leads past a potential arson attack areas, such as near rubbish skips).
- The Emergency Plan.

7.3 What People / Staff Should Do If They Discover a Fire.

- Raise the alarm by operating the nearest fire alarm call point.
- Evacuate to a safe place.
- DO NOT USE THE LIFT (unless it has been designated as a refuge or part of the emergency escape route and conforms to the criteria given in the British Standard BS5588: Fire Precautions in the Design and construction of Buildings.
- Trained personnel to tackle the fire only where appropriate.
- Where appropriate check toilets and close windows and doors on the way out.
- If staff have responsibilities for assisting persons with Personal Evacuation Plans they must respond as required following the actions as identified in the Plan.
- Leave the building by the nearest exit.
- Do not stop or return to collect personal belongings.
- Ensure visitors are escorted from the building to the assembly point.
- Close any doors en-route without delaying your escape.
- You must remain at the assembly place.
- Return to the building only when authorised to do so.
7.4 What People / Staff Should Do If They Hear the Fire Alarm.
- Leave the building by the nearest exit.
- Close any doors en-route without delaying your escape.
- Do not stop or return to collect personal belongings.
- Do not use any fire fighting equipment unless you have been trained.
- Do pass any information to the building responsible person at the assembly point.
- You must remain at the assembly place.
- Return to the building only when authorised to do so.

7.5 Contacting the Emergency Services.
- Utilise a landline / mobile telephone (if no power available).

7.6 Emergency Services Liaison Procedures.
- Fire Wardens will liaise with the emergency services on arrival – they must wear hi-visibility vest, armband etc.
- Provide information to the emergency services of anyone missing and where they were last seen.

7.7 Specific Information for the Emergency Services.
Fire wardens are required to provide the following specific information to the emergency services: -
- Type of emergency.
- Location of the fire / incident.
- Missing persons.
- Flammable material stores.
- Location of high risk areas.
- Any unusual activities such as building works or temporary structures.

7.8 Escape Routes.
Fire Wardens will be required to provide to the emergency services a map or diagram of the building for ease of reference.

It should include other relevant information such as details of fire fighting equipment provided, location of designated ‘Safe Refuges’, types and location of emergency exit signs, locations of manual break glass points and emergency lighting.
7.9 Evacuation Arrangements for Disabled People.

The safe and effective evacuation of disabled people is very important. The procedures adopted for people with a disability who are visiting or who are employed in the building will be different to those for person with a disability visiting the building that will be unfamiliar with its layout.

- **Progressive Horizontal Evacuation.** This system can be used in buildings with a phased alarm system. It involves a person passing from one ‘fire compartment’ into another that is not part of the initial evacuation zone. A ‘fire compartment’ is a part of a building separated from other parts of the same building by fire-resisting walls, ceilings, floors and doors of 60 minutes fire resisting construction.

- **Evacuation by Lift.** This method is only possible where lifts have a secondary power supply/battery backup and a structurally protected lobby shaft (often called ‘fire-fighting lifts’). These are specially constructed lifts with special features and are not the same as ordinary lifts in most buildings.

- **Evacuation by Stairs.** This method involves the use of equipment such as special evacuation chairs, but is usually only possible if people are being evacuated downwards or horizontally.

- **Use of Refuges.** BS5588: Part 8 defines refuges as: ‘Relatively safe waiting areas for short periods. They are not areas where disabled people should be left alone indefinitely until rescued by the fire brigade or until the fire is extinguished’. *(N.B. This should not be confused with the use of refuges in progressive horizontal evacuation)*

7.10 Visitors and / or Contractors.

Visitors will be present on a regular basis. Other people, such as contractors, cleaners, etc. may be present on a regular, or ad-hoc basis. Any of these people could require assistance to evacuate the building and they all need to be taken into account.

Arrangements should be made to ensure that all visitors are logged in and out of the building, using a visitors signing in book. The person hosting the visitor(s) should ensure that they are made aware of fire evacuation procedures for the premises. In the event of a fire evacuation, the person hosting the visitor(s) is responsible for escorting them to the fire assembly point.

Contractors should also be logged in and out of premises. Unless they are to be constantly supervised by staff or nominated personnel, they should also be given information about the site’s fire evacuation procedures that they should then follow in the event of a fire evacuation.
7.11 Fire Wardens.

Fire Wardens have an important role to play and will be given responsibility for a specific area, i.e. a floor or a section, and will have general duties in an evacuation such as: -

- To 'sweep' the building on their way out.
- To carry out 'first aid' fire fighting if trained and safe to do so.
- They must ensure that they do not work alone and put themselves at risk.
- Proceed to the assembly point and close doors on way out.
- Helping the person in overall control of the evacuation by confirming their area has been checked.

7.12 Re-Entering the Building.

- Trained Fire Wardens will ensure that people are prevented from re-entering the building.
- Trained Fire wardens in consultation with the Management Team will decide when staff / service users may re-enter the building.
- **Note:** If the emergency services have been called then the Senior Fire Service Officer is responsible for giving permission for re-entry to the building.

7.13 Contingencies if not re-entering the building.

- Ensure there are suitable arrangements in place if the building cannot be re-entered.
- Consider weather conditions, time of year, length of time before re-entry is possible etc.
- Personnel will remain in the assembly area, or be relocated to Shire Hall as a temporary measure, or sent home if deemed appropriate.
- Trained Fire Wardens will monitor / escort service users during this time.
- Trained Fire Wardens will ensure that all service users have arrived at the relocation point.
### EXAMPLE FIRE SAFETY MAINTENANCE CHECKLIST

#### Daily Checks (not normally recorded)

  - Do all roller shutters for compartmentation working correctly? [ ] [ ] [ ]
  - Do all internal fire doors close against their rebate / stop? [ ] [ ] [ ]

- **Escape Lighting**
  - Do all luminaries and exit signs working when tested? [ ] [ ] [ ]
  - Are emergency generators working correctly? [ ] [ ] [ ]

- **Fire Fighting Equipment**
  - Is the “pressure” in stored pressure extinguishers correct? [ ] [ ] [ ]
### Three Monthly Checks

| General |
|------------------|--------|
| Are emergency tanks / ponds at their normal / correct level? | NO | YES | N/A |
| Are vehicles blocking fire hydrants or access to them? | NO | YES | N/A |
| Additional items from manufacturers requirements? | NO | YES | N/A |

### Six Monthly Checks

| General |
|------------------|--------|
| Has the emergency evacuation lift (if fitted) been tested? | NO | YES | N/A |
| Have sprinkler systems been tested by a competent person? | NO | YES | N/A |
| Have release and closing mechanisms on fire resisting compartment doors and shutters been tested? | NO | YES | N/A |
| Fire Warning Systems |
| Has the system been checked by a competent person? | NO | YES | N/A |
| Escape Lighting |
| Do all luminaries work for a third of their rated value? | NO | YES | N/A |

### Annual Checks

| Escape Routes |
|------------------|--------|
| Do all fire doors work correctly? | NO | YES | N/A |
| Is escape route compartmentation in good condition? | NO | YES | N/A |
| Fire Warning Systems |
| Has the system been checked by a competent person? | NO | YES | N/A |
| Escape Lighting |
| Do all luminaries operate on test for their full duration? | NO | YES | N/A |
| Has the system been checked by a competent person? | NO | YES | N/A |
| Fire fighting Equipment |
| Has all equipment been checked by a competent person? | NO | YES | N/A |

### Miscellaneous

| Miscellaneous |
|------------------|--------|
| Have dry / wet risers been tested by a competent person? | NO | YES | N/A |
| Has smoke control systems been tested by a competent person? | NO | YES | N/A |
| Has external access for the fire and rescue service been checked for availability at all times? | NO | YES | N/A |
| Have any fire fighters switches been tested? | NO | YES | N/A |
| Are fire assembly points clearly indicated by signs? | NO | YES | N/A |
EXAMPLE FIRE SAFETY TRAINING PROGRAMME

All employees will receive adequate fire safety training and all fire safety training sessions will be delivered by a competent person. There will one / two fire drills per year to test the fire safety training.

Fire Safety Training Sessions

**New Employees:** Induction Programme.

**Current Employees:** One / Two training session per year.

**Fire Wardens:** One / Two training session per year specific to their duties.

**Managers:** One / Two training session per year specific to their duties and including fire safety risk assessment, responding to fire hazards, fault reporting procedures, liaising with the fire service, record keeping, induction of new staff, fire safety policies and procedures.

Fire Safety Training Topics

- The significant findings from the fire risk assessment and fire safety policies;
- What to do on discovering a fire;
- How to raise the alarm, including the locations of fire alarm call points (break glass points);
- The action to take upon hearing the fire alarm;
- The evacuation procedure for alerting guests, residents and visitors including, where appropriate, directing them to exits and assembly points at a place of total safety;
- The arrangements for calling the fire and rescue service;
- The location and, where appropriate, the correct use of portable fire extinguishers and fire-fighting equipment;
- Knowledge of escape routes including stairways and especially those not in regular use;
- How to open all emergency exit doors;
- The appreciation of the importance of fire doors, keeping them closed and not wedged open to prevent the spread of smoke and heat, keeping escape routes unobstructed;
- Where appropriate, isolating electrical power and gas supplies and stopping machines and processes;
- The reasons for not using lifts (except those specifically constructed as evacuation lifts);
- The safe use of and risks from storing and working with highly flammable and explosive substances;
- General fire precautions, fire awareness and good housekeeping practices;
- The no smoking policy (where applicable);
- Special provisions for assisting disabled people and any training needed;
- Identifying fire hazards and fire incidents reporting procedures; and
- Equipment fault reporting procedures.

Fire Safety Training Records

All fire safety training will recorded to include the date of instruction; the duration, name of the person giving the instruction, names of persons receiving the instruction; and the nature of the instruction and / or, drill.
EXAMPLE FIRE SAFETY TRAINING RECORD

Date: ___________________________ Duration: ___________________________

Given By: ___________________________ Session For: ___________________________

Subjects Covered

☐ The significant findings from the fire risk assessment and fire safety policies.
☐ What to do on discovering a fire.
☐ How to raise the alarm, including the locations of fire break glass points.
☐ The action to take upon hearing the fire alarm.
☐ The evacuation procedure for alerting guests, residents and visitors including, where appropriate, directing them to exits and assembly points at a place of total safety.
☐ The arrangements for calling the fire and rescue service.
☐ The location and, where appropriate, the correct use of portable fire extinguishers and fire-fighting equipment.
☐ Knowledge of escape routes including stairways and especially those not in regular use.
☐ How to open all emergency exit doors.
☐ The appreciation of the importance of fire doors, keeping them closed and not wedged open to prevent the spread of smoke and heat, keeping escape routes unobstructed.
☐ Where appropriate, isolating electrical power, gas supplies, stopping machines and processes.
☐ The reasons for not using lifts (except those specifically constructed as evacuation lifts).
☐ The safe use, risks from storing and working with highly flammable/explosive substances.
☐ General fire precautions, fire awareness and good housekeeping practices.
☐ The no smoking policy (where applicable).
☐ Special provisions for assisting disabled people and any training needed.
☐ Identifying fire hazards and fire incidents reporting procedures.
☐ Equipment fault reporting procedures.
